Can your lab instruments provide ...

... high levels of automation,
... advanced accuracy,
... quick response times?

Let our instruments accomplish these goals for you!

lab instruments for oil and gas

Basic data about PSL

- Manufacturer of innovative lab instruments for the petroleum and petrochemical industries
- Our products have been made in Germany since 1999
- PSL is represented in the USA and by local agents worldwide
- We operate internationally - export rate >90%

Our devices measure:

**Flow Assurance**

- Pour Point
- Asphaltene Flocculation
- Wax Appearance and Deposition
- Scale Formation
- Hydrate Formation

**Physical Properties**

- Viscosity
- Drag Reduction
- Thermal Conductivity

Lab instruments for oil and gas
Fields of Application

Our Concept

- Intensive collaboration with customers and universities results in up-to-date scientific and technological knowledge
- Participation in international conferences and workshops fosters our expert knowledge of petroleum
- We use our acquired expert knowledge to design our devices

We provide tomorrow's technologies today!
